TX; and author of *Virus Hunters*

David Segrest, J.D.—Gardere, Wynne & Swell, LLP

Chair, Texas Tech University Alumni Association

*invited, not yet confirmed

About the Center for Biodefense, Law and Public Policy

In September 2001, Chancellor David R. Smith appointed the
Task Force for Anti-Terrorism and Public Security to determine
how the university—as a public institution—could best respond to
the needs of the community, state and nation through our research,
education and community service resources. Among the recom-
mendations from that Task Force was the formation of such a
Center to address law and public policy issues.

The establishment of the Center is intended to provide an
opportunity for interdisciplinary collaboration to move in the
direction of solutions for the complex, and cross-disciplinary area
of biodefense. The disciplines of law, public policy, mass commu-
nications, political science, microbiology, medicine, forensic
pathology, animal and food science and plant science comprise the
range of academic fields represented by the faculty associated with
the Center.

Victoria Sutton was appointed director of the Center in
September 2002. Activities planned include the inaugural lecture, a
symposium, Legal Issues in Bioterrorism, in February 2003. The
Center is exploring collaborations with other academic centers
across the nation.

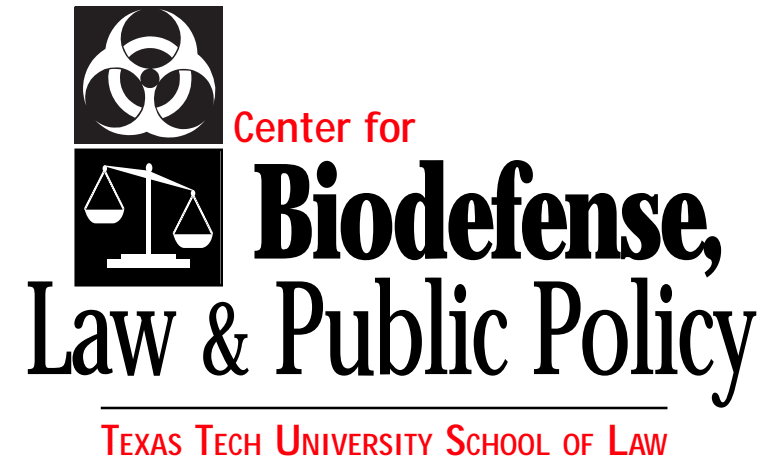

The Center faculty are available for consultation in these areas
with government, industry and associations.

For additional information about the Center, publications, videos and books, log on to:
