

TEXAS TECH UNIVERSITY

Office of the President

DATE: August 31, 2016
TO: Texas Tech University Faculty and Staff
FROM: Lawrence Schovanec, President
SUBJECT: President's Leadership Institute

Leadership is an essential component to an organization, including institutions of higher learning. Texas Tech University is promoting leadership characteristics within our students every day, but it is also important that we provide our faculty and staff the same opportunities.

The Fourth Annual President's Leadership Institute will get underway this fall and offers opportunities for faculty and staff to engage with administrative leadership and learn the tools and styles that comprise leadership in higher education. I invite those interested to apply and ask staff and supervisors to encourage their faculty and staff to take advantage of this opportunity.

If you are interested in strengthening your leadership skills, please consider this opportunity. Applications will be accepted through Friday, September 23, 2016, and the class will be limited to 20 participants. More information regarding this institute, along with application materials can be found at the [President's Leadership Institute website](#).
