at a School of Law in the U.S. since 2003*

WRITING REQUIREMENT:

Opportunity to work with faculty who know
the field of biodefense law

Opportunity for presentation and
publication of your research

The Center for Biodefense, Law and Public Policy

Following a recommendation by the Texas Tech University System Task Force on Anti-Terrorism and Public Security in April 2002, the Center for Biodefense, Law and Public Policy was formally established in the fall of 2002. The establishment of the Center provides an opportunity for cross-disciplinary and interdisciplinary collaboration to seek solutions in the complex area of biodefense. A wide range of disciplines, from law to forensic pathology, are represented by the Center's 15 faculty members. Dr. Victoria Sutton, from the Texas Tech School of Law, was named the Director of the Center in September 2002.
